DETAILED ACTION

Allowable Subject Matter

1. Claims 45-50, 52-54, and 55-64 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 45-50, the prior art alone or in combination does not teach the limitation of a capacitor having the valve metal anode includes a cross-sectional density gradient and a peripheral portion of the valve metal anode is relatively less dense than a central portion of the valve metal anode.

With respect to claims 52-54, and 64, the prior art alone or in combination does not teach the limitation of a capacitor wherein said cathode member comprises an elongated cathode member and said elongated cathode member is at least partially inserted into one of said at least two cavities, and wherein said cathode member has a core surrounded by a high capacitance material and a separator layer surrounding the high capacitance material.

With respect to claims 55-56, the prior art alone or in combination does not teach the limitation of a capacitor having the cathode member comprises an elongated cathode member and the elongated cathode member is at least partially inserted into one of the at least two cavities, and wherein the cathode member has a core surrounded by a high capacitance material and a separator layer surrounding the high capacitance material.

With respect to claims 57-63, the prior art alone or in combination does not teach the limitation of the capacitor having an anode member and the cathode member each

have major surfaces and the major surface of the anode member is disposed substantially orthogonal to the major surface of the cathode member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
